Files Spread for Windows Form - Documentation - Documentation\readme.txt for Windows Form for Windows Form A: You can look into the PowerPoint Interop. This allows you to have a WPF application make a PowerPoint file from a presentation. Q: How to add and remove object type based on checkbox selection? I'm making a configuration application for a JavaScript game, and I'm at a bit of a dead end. I have a configuration screen with a 'Add' and 'Remove' button on the left, and three checkboxes, one for each item in the configuration page. When the 'Add' button is clicked, I wish to add an object of the same name as the checkbox (such as "Object") to a collection. When the 'Remove' button is clicked, I want to remove that object from the collection. Here's my code: Configuration var Collection; \$("#btnAdd").click(function() { var newObject = new Object();
